

Woa!!!!

XM Satellite Radio is a subscription service paid for by the consumer. Just like the level of programming and services one is able to choose from with phone service, cellular, wireless, cable, and other broadcast media, XM should be permitted to provide the quality of service demanded by their customers. I Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I, as a paying customer, demand and deserve.
